The 6th Sino-German Professor Forum 2014

The Sino-German Professor Forum is an initiative of the “Gesellschaft Deutscher Professoren Chinesischer Herkunft” (GDPCH德国华人教授学会). The forum serves as an interdisciplinary exchange forum for German and Chinese professors who work actively in bilateral scientific and higher education collaborative projects or intend to start such collaborations. The ultimate goal of this forum is, by regular meetings, to intensify exchanging experiences, to make project-oriented recommendations and to become a competent and independent Think-Tank, which helps with the promotion of innovative cooperation in science and higher education between Germany and China.

The forum 2014, hosted by Kunming University of Science and Technology (KUST), devotes itself to the topic “New Trends of Sciences and Technologies in Prospects”. Members of the GDPCH, professors and researchers of KUST, as well as representatives and coordinators of national and international collaborative research projects and organizations are gathered to share their views about the new development trends of sciences and technologies in their own research areas.

We hope the forum 2014 will offer a platform for exchanging experiences among the participants from different disciplines and explore new cooperation initiatives and joint research projects.
